## Local and District

W. A. Law, was a visitor to Cal-  
gary last week.

E. A. Thompson left last week  
for treatment at Keadler Springs,  
Manitoba.

Born in Drumheller hospital, to  
Rev. and Mrs. John Clarke, of Delia,  
on August 7, was a child.

Miss Margaret Wilson, of Van-  
couver, is visiting her parents,  
Mr. and Mrs. James Wilson.

Mr. H. F. Crowther left on  
Thursday for a visit to a cousin in  
Calgary.

Mr. and Mrs. D. H. Campbell  
enjoyed a vacation at Sylvan Lake  
last week.

Miss Christine Peterson returned  
recently after spending a two weeks  
vacation with her parents at Min-  
neapolis, Alberta.

Mr. and Mrs. Sam Price and Mr.  
and Mrs. Chas. Greer motored to  
Banff on Sunday last, visiting Mr.  
and Mrs. Frank Hockaday.

Attention of officers and members  
of the Delia Agricultural Improve-  
ment Association is directed to the  
of the annual meeting appearing in  
another column of this issue.

Perce Gates and Bud Hamilton  
returned on Thursday last from a  
motor trip to Creston, B.C., where  
they visited with friends.

John Walker, of the Highland  
Feed Market, met with a painful  
accident one day last week when  
one of his fingers got caught in the  
teeth of a meat grinder.

Harvesting operations are now  
getting under way in the district.  
Charlie Lawrence started working  
early this week, and Howard Ste-  
venson also is at work.

The many friends of Mr. Robt.  
Miller will be glad to know that she  
has completely recovered from her  
recent illness, having returned home  
from the Holy Cross hospital on  
Thursday last week.

Mr. Lloyd McGuire, of Ottawa,  
Ont., left for home on Saturday  
morning last, after paying a brief  
visit with his brother-in-law, and  
with his mother, Mrs. Annie  
Kitchin, of Delia. She was accom-  
panied by her sister, Mrs. John  
Kitchin.

The annual open-air service of the  
United Methodist Church, which  
his friends were taken by Rev. J.  
Clarke and Rev. Kitchin in the  
Handshake on Sunday afternoon last.  
It is estimated that a larger crowd  
attended than the four hundred said  
to be present last year. The Michi-  
canean band played a number of  
songs.

Exceedingly hot weather has pre-  
vailed generally over the past week,  
succeeding a drop in temperature  
which, in the early hours of Tuesday  
the 28th, brought a slight touch of  
frost in low places. Early optimism  
for a return to the normal in view  
of the change, is being somewhat  
checked by the prospect, the almost  
total lack of moisture since early  
July having prevented normal filling  
particularly in the north.

The F. W. McDougall Construc-  
tion Co. of Calgary is now contract-  
ing for the coming removal of Foot  
Elevator No. 1 to a position farther  
east, and adjacent to No. 2. Much  
preparation work is required, which  
includes the laying of four sets of  
track to accommodate the rollers in  
which the elevator will run. This is the  
third elevator in the province to be  
thus removed.

Two provincial track and field  
meets will be held during Septem-  
ber, the first for girls only at Wet-  
ter on Labor Day, with women and  
troubles will be presented in a series  
of similar, intermediate and junior  
meets. On Saturday, Sept. 16, at  
Red Deer the provincial inter-schol-  
astic boys' and girls' will be held.

Information as to both these meets  
may be obtained by writing to Miss  
Joan Lawrence, 821 - 104th  
Avenue, Edmonton.

## World Shipments of Wheat

World shipments of wheat totalled  
3,000,000 bushels last week, of which 2,000,000  
bushels were shipped from  
Argentina, and 1,000,000 bushels  
from Canada.

## Breeding Stock Selection

Letting breeding stock selection  
be a problem which must be constantly  
in the mind of live stock breeders,  
and a few words regarding the subject  
may be in order. Selection implies  
choice, and in live stock breeding  
it indicates that certain animals  
are chosen to breed, and the others,  
and consequently the desirable  
individuals are used for breeding  
purposes while the others are  
discarded and sold for meat.

Selection is the keynote to suc-  
cess in breeding regardless of what  
system of mating is being used. The  
breeder must select the best animals  
to breed, and the best animals to  
sell.

Selection is the keynote to suc-

## The Poison Ivy Season

Poison ivy is a perennial in many  
parts of Canada, and its leaves are  
not to be ignored. Each dweller  
especially after from the effects of  
contact with this dangerous weed, as  
well as from its seedling, will find  
it well to recognize it.

The mere touching of poison ivy  
is likely to cause a peculiar inflam-  
mation of the skin, which is known  
as the "poison ivy rash". Sometimes  
there is a slight redness and itching;  
at other times, contact is followed  
by large vesicles, which are  
attended by a severe burning  
accompanied by a severe  
itching sensation.

When poison ivy has been ac-  
tually touched, the use of disinfect-  
ants or cold cream should be ap-  
plied carefully and when those  
disinfectants are used the poison  
first aid consists in washing the  
parts affected with alcohol or coal  
oil, or with non-oil soap.

An experienced farmer, who  
has been troubled with poison  
hickies, should avoid touching poison  
ivy or anything containing it.  
Walking through underbrush is dan-  
gerous, as the leaves are likely to  
come in contact with poison ivy, or  
its seedling.

The time can be identified by the  
leaf venation. Its leaf is divided  
into three leaflets, which differ-  
entiate it from other plants. The  
leaves are often common in the  
latter has five leaflets. The  
flower of the poison ivy is a small  
white flower, which is often seen  
during the early part of the season.  
After ripening, the fruit turns  
very white.

To be on the safe side, whether  
one knows positively or not that a  
vine is poison ivy, any three-leaved  
creeper should be avoided.

## Domestic Bureau of Statistics

(Issued July 29, 1936.)  
Registrations of Births, Deaths and  
Marriages, June, 1936

The Dominion Bureau of Statistics  
announces today the summary of registra-  
tions of births, deaths and marriages during  
the month of June, 1936, in 48 cities  
and towns of Canada having populations  
of 20,000 and over.

Births registered in these cities and  
towns in June numbered 37,000, deaths  
12,000, and marriages 4,700, as compared  
with 41,000 births, 14,000 deaths, and 4,900  
marriages in June last year, showing an  
increase of 4,000 in births, practically no  
change in deaths, and a decrease of 200  
in marriages.

Births registered in these cities and  
towns in June numbered 37,000, deaths  
12,000, and marriages 4,700, as compared  
with 41,000 births, 14,000 deaths, and 4,900
